Video Wall

VHC-R, VMC-R, VHC-E, VMC-E, VMB-U series

An immersive viewing experience for any business

Samsung’s video wall displays (VHC-R, VMC-R, VHC-E, VMC-E, VMB-U) provide a captivating viewing experience for a wide variety of business settings. Each display series offers exceptionally slim depth, continuous operation capabilities and IP5X certification provide endless possibilities for retail stores, office spaces, public spaces and more. Equipped with wide viewing angles and anti-glare panels, and built to operate all day, Samsung’s video walls ensure businesses have an effective and clear communication channel, even after traditional business hours.

Key features

Narrow bezel

A narrow bezel-to-bezel* design creates a uniform picture across screens. By minimizing the visual distraction of the screens, the displays present a single picture for viewers to focus on.

* Bezel width varies by video wall model.

Slender design

The exceptionally thin 69.9mm* cabinet depth provides businesses with more flexibility to create the exact video wall they need and install it in the most impactful location.

* Exact cabinet depth varies by video wall model.

Viewing Angle

Wide viewing angles mean content is easily visible even if viewers aren’t standing directly in front of the display. Audiences can get clear details and vivid colors regardless of the screen’s location.

Non-Glare Panel, 24/7 operation

Non-glare panels distribute light across the screen to maintain accurate content. Combined with a high contrast ratio and 24/7 operation, visuals are clear during day or night — regardless of ambient light.

Mobile Calibration

For quick and simple calibration, Color Expert Pro Mobile enables white balance adjustments for displays up to 3x3 using a mobile camera.

Industry standard certified

Samsung’s video wall displays are EMC class B compliant*, meeting strict standards of electromagnetic wave emission. its packaging also underwent a rigorous ISTA lab test to minimize possible damage during delivery.

* EMC class and ISTA certification vary by video wall model.
